INSTRUCTIONS

For tax years 2020 through 2025, an Individual Income Tax credit is available for eligible physicians, advanced practice registered nurses, or physician assistants who serve as preceptors for qualifying clinical rotations required by a medical school, physician assistant program, or advanced practice nursing program. Credit amounts are phased in over a five-year period. Be sure to use the correct TC-62 schedule for the tax year.

To claim the credit you must:

- **attach** a copy of this form to your tax return if you file by paper, **or**
- **include the information from this form** when you file your return electronically.

Keep a copy of this form for your records.

The credit is earned in the tax year the rotation is served. You can claim 50% of the credit in the tax year it is earned and 50% of the credit in the following tax year. The total credit you can claim is limited to 50% of your tax liability after all other credits are applied. Unused credits can be carried forward for up to 10 years after the year they are earned.

If you earn the maximum credit and served additional rotations that would have qualified for the credit, you may claim a deduction equal to the amount that the credit would have been for the additional rotations. You can claim 50% of the total deduction in the tax year it is earned and 50% of the deduction in the following tax year. The deduction may be earned for up to six additional rotations.

Credit and deduction amounts depend on if you are a physician, advanced practice registered nurse, or physician assistant as well as the percentage of your practice that is composed of Medicaid-insured, Medicare-insured, and self-pay patients. Be sure you are completing the correct section of the TC-62.

Part I: General Information

All taxpayers are required to complete this section.

Check the appropriate box to certify that you are a physician, advanced practice registered nurse, or physician assistant. If you are a physician, you will complete **Part II: Credit for Physician Preceptors**. If you are an advanced practice registered nurse or a physician assistant, you will complete **Part III: Credit for Advanced Practice Registered Nurse and Physician Assistant Preceptors**.

Check if you were compensated for serving as a preceptor. If you check **Yes**, you do not qualify for the credit.

Enter the total number of hours you served as a preceptor during the year.

Enter the number of rotations you served as a preceptor during the year. **If you did not serve at least two rotations, you do not qualify for the credit.**

Complete **Table A** to calculate the combined total of Medicaid-insured, Medicare-insured, and self-pay patients in your practice. Use the percentage of your practice that is Medicaid-insured, Medicare-insured, and self-pay patients to determine the amount of credit you can take.

Part II: Credit for Physician Preceptors

Complete Part II only if you are a physician. A physician can receive a credit for each clinical rotation served as the preceptor for a medical school-required clinical rotation, advanced practice nursing program-required clinical rotation, and physician assistant program-required clinical rotation.

Complete **Table B** if at least 50% of your practice consists of Medicaid-insured, Medicare-insured, and self-pay patients. The credit amount is \$1,000 for each rotation served, with a maximum of \$4,000 a year, but the credit amounts are phased in over a five-year period. **For 2022, the credit is \$600 for each rotation, up to \$2,400 total.**

Complete **Table C** if at least 30% of your practice consists of Medicaid-insured, Medicare-insured, and self-pay patients. The credit amount is \$750 for each rotation served, with a maximum of \$3,000 a year, but the credit amounts are phased in over a five-year period. **For 2022, the credit is \$450 for each rotation, up to \$1,800 total.**

If your practice does not consist of at least 30% of Medicaid-insured, Medicare-insured, and self-pay patients, you do not qualify for the credit.

Part III: Credit for Advanced Practice Registered Nurse and Physician Assistant Preceptors

Complete Part III if you are an advanced practice registered nurse or a physician assistant. An advanced practice registered nurse or physician assistant can receive a credit for each clinical rotation served as the preceptor for an advanced practice nursing program-required clinical rotation or physician assistant program-required clinical rotation.

Complete **Table D** if at least 50% of your practice consists of Medicaid-insured, Medicare-insured, and self-pay patients. The credit amount is \$750 for each rotation served, with a maximum of \$3,000 a year, but the credit amounts are phased in over a five-year period. **For 2022, the credit is \$450 for each rotation, up to \$1,800 total.**

Complete **Table E** if at least 30% of your practice consists of Medicaid-insured, Medicare-insured, and self-pay patients. The credit amount is \$500 for each rotation served, with a maximum of \$2,000 a year, but the credit amounts are phased in over a five-year period. **For 2022, the credit is \$300 for each rotation, up to \$1,200 total.**

If your practice does not consist of at least 30% of Medicaid-insured, Medicare-insured, and self-pay patients, you do not qualify for the credit.
