Major Achievements

FY2007-2008

Director Stevens again led the Agency in developing a strong and challenging annual business plan. All Department business plans tie directly to the Strategic Plan. This enables us to maintain focus on our major long-term goals and objectives.

This year DOR continued to make major strides in processing of tax returns from receipt of mail to processing of refunds and depositing of money to files being stored and scanned. This fiscal year, we deposited 2,024,425 checks, processed 68,916 batches, and gross deposited monies totaling \$10,756,197,733. We reduced deposit opportunity cost dollars to \$114,000, a decrease of 70 percent over the past two years.

Total enforced collections this year increased to \$703 million, an increase of 21 percent. Closed audits increased 48 percent and audit collections increased by \$48.4 million, a 38 percent increase.

Our annual customer satisfaction survey, conducted and analyzed by the University of South Carolina, found a 96.3 percent satisfaction level for the amount of time it took to receive a state income tax refund check. This is a remarkable statistic, due in part to implementation of over 100 process improvements in the Revenue Operations area alone by both frontline employees and management. The focus on process improvement across the Agency has significant benefits for DOR, but ultimately also for SC citizens and the Agency's stakeholders.

Achievements related to the major strategic objectives this year included:

Find Non-filers:

Individual Income Tax (IIT) Non-filers – The Filing Enforcement Section implemented a manual adjustment process in the Data Warehouse Discover Tax system to perform desk audits on all failure to file notices sent to potential non-filers. This process improvement helped ensure a more accurate notice to the taxpayer on the front end. As of June 30, we sent 597 IIT non-filer notices for a total of \$1.8 million assessed using this new process. A field referral process was also developed and business rules were established to identify cases that need to be referred to a field auditor. During FY 08, we collected \$15,458,856 on notices sent to taxpayers.

Use Tax Non-filers – DOR continues to exchange information with the other Southeastern Association of Tax Administrators (SEATA) states on a monthly basis. We also are continuing to identify possible non-filers through the U.S. Customs project and the U.S. Coast Guard. We are continuing to obtain information from transportation companies on furniture deliveries from North Carolina into this state. In addition, warranty information from manufacturers of All Terrain Vehicles and similar products enable us to assess for use tax on these items.

Nexus/Discovery – Nexus/Discovery focuses on the large multi-state and multi-nation corporations doing business in South Carolina, but who are not reporting in South Carolina. This section registered a total of 377 taxpayers and collected \$23,348,221, an increase of 60 percent over last year. Eight hundred questionnaires were sent to potential nexus non-filer cases. Areas

of focus this year included issues relating to credit card companies, franchisors, medical companies and accommodations providers.

Establish a Data Warehouse:

The purpose of this project is to use data warehouse technology to identify uncollected revenues which consist of taxes due from non-filers, under-reporters, and failure-to-pay taxpayers. Primary emphasis is on Individual Income, Sales and Use, and Corporate taxes. This multi-year project collected \$34 million in FY 08. Approximately \$75 million has been collected over the last three years through the Data Warehouse.

Maximize Voluntary Compliance through Fair Share Activities:

DOR recognized that many tax issues exist in South Carolina where there is general disagreement in the interpretation and application of the tax statutes. Last year Director Stevens assembled a team of agency staff to identify tax issues suitable for resolution through litigation. At the same time, the legal staff was organized to better assist the audit staff in providing constant legal support while auditing some of the specific issues identified.

Eighteen issues were identified during this process relating to taxpayers in the areas of licensing and sales of alcoholic beverages, income, property and admission taxes. Legal staff researched and prepared detailed research notebooks for each of the areas. Issues were then identified as priority litigation projects. Audits were conducted on returns containing these issues. To date, a significant number of audits have been completed. Some issues have progressed through the appeal process and others are in various stages of litigation, including cases before the S.C. Supreme Court.

Implement a Formal Audit Program:

As a part of our long-term strategy and in connection with the Fair Share program above, DOR formalized its audit approach last year. With the increasing capability of technology, the need to document and measure audit selection criteria, and the need to wisely use audit resources, a formal audit plan was implemented. This plan structured the audit selection program and also has allowed the audit staff to better identify and target training needs of DOR auditors. Through this approach, we have closed 48 percent more cases and increased audit collections to \$175.7 million, an increase of 38 percent.

Utilize Treatment Scenarios:

The Data Warehouse project also led DOR to implement the use of treatment scenarios in collections efforts. Treatment scenarios represent the way that a case should be worked, implying different treatments for different cases. Treatment scenarios were developed to assign cases based on the combination of collect-ability risk and balance of receivables. This has allowed DOR to more productively target collections staff resources, particularly for collections in the assessment stage. Year-to-date actual dollars collected increased by 28.9% in FY08, representing an increase of \$47,320,277.

Drive One-Stop Business Registration:

The goal of this project is to be a “one-stop” gateway for business and professional registration and licensing for services offered by federal, state and local government within South Carolina.

This enterprise project is an example of how collaboration between agencies not only benefits the taxpayer, but also increases the cost efficiency of the agencies involved in the streamlined processes. Partners in the South Carolina Business One Stop (SCBOS) project have included the Secretary of State, Employment Security Commission, Department of Health and Environmental Control, Department of Consumer Affairs, Department of Labor, Licensing and Regulation, Office of CIO (Budget and Control Board), Department of Commerce, S.C. Chamber of Commerce, S.C. Association of Counties and the Municipal Association of S.C.

Effectiveness of the program was evidenced this year by:

- Application for the Federal Employee Identification Number (FEIN) was integrated into SCBOS to allow business owners to apply online.
- Consumers' usability of the SCBOS website was engineered.
- Renewals of four new applications for the Department of Consumer Affairs were launched.
- A new agency, Clemson Department of Plant Industry, was brought on to SCBOS, allowing consumers to apply online for permits and applications.
- Automation between the Employment Security Commission (ESC) and SCBOS was improved. Since January of this year, 716 applications were processed for ESC.
- Consumers are now allowed to make changes at one agency and the changes are passed on to other participating state agencies.
- Additional educational communication and marketing was done to increase stakeholder awareness of the SCBOS program and benefits. Users consistently applaud the SCBOS program for both ease of use and time savings for the business.

Provide Stakeholder Education and Feedback:

In order to comply with the tax laws, taxpayers need to understand the laws and their filing obligations. A major part of this initiative involves taxpayer education workshops. This year, Sales and Use Tax seminars were held around the state for the following industries: Education, Manufacturing, Government & Municipalities, and businesses required to know the Maximum Tax laws.

DOR also conducts free monthly Sales Tax Forms and Withholding Tax workshops. The target audience is new businesses. This audience was expanded this year to include registrants from Georgia, North Carolina, Virginia, and Iowa. Staff is also invited to participate in meetings of various professions to discuss tax law requirements (e.g., S.C. Society of Accountants, S.C. Farm Bureau, S.C. Mortician's Association). In addition to workshop and seminar promotion through our employees, brochures, and online resources, bi-weekly e-mails are sent out over the Taxpayer Education Listserv.

The Agency continues to provide instructors to the IRS Small Business Workshops conducted around the state. An average of three of these workshops is held each month. In addition, DOR has a longstanding relationship with Clemson University, serving as instructors for their annual taxpayer education workshop that typically attracts over 1,500 participants in six locations around the state.

Develop the South Carolina Integrated Tax System (SCITS):

The SCITS project is a major five-year project to completely replace the existing aging computer system with a modern, state-of-the-art integrated tax system. This will provide enhanced services for both the taxpayer and the Agency. Customers will have access to their accounts 7 days a week, 24 hours a day. The Agency plans to provide real time, “once and done” processing wherever possible. The first phase of this system will be released during third quarter of FY09. Major milestones of the project were met this year through substantial work of many employees across the Agency. To date, 62 percent of the overall effort for this phase has been completed. Training plans for not only all DOR employees, but also county employees who access the Property Tax systems are being designed to begin first quarter of FY09. Design work for the second phase of the system is also underway.

Provide Property Tax Training for Newly Elected County Auditors:

The Agency has responsibility to oversee elected and appointed officials of the 46 South Carolina counties with regard to the equalized administration of property tax laws. This local government funding amounts to approximately \$5 billion. This initiative was to provide consistent guidance and education to the newly elected county auditors on the tax laws they are required to administer. The Property Division has partnered with the South Carolina Auditors, Treasurers and Tax Collectors organization (SCATT) and the South Carolina Association of Assessing Officials organization (SCAAO) to establish the programs. The first two courses of the curriculum were developed and offered at the SCATT Academy in February 2008. The courses attracted not only the newly elected auditors, but also veteran auditors who wanted a refresher course. Feedback was excellent. Repeat sessions will be held just before the newly elected auditors take office in July 2009. Additional courses are also being planned.

Upgrade the Agency Website:

Upgrading the aging technology of our website to provide enhanced capability and usability is another important need. While initial work was done, intensive work had to be postponed due to available resources being assigned to other agency technology priorities this year, including the new tax processing system, SCITS. Work will be resumed after the rollout of SCITS.

Improve Performance Measurement Systems and Processes:

Having appropriate measures defined and reporting mechanisms in place is the basis for making data-based decision-making. During the past year each dashboard and performance measure was analyzed for relevance to business operations. The methods of compilation and reporting were also reviewed. The goal of this process was to allow personnel to assess actual performance against expected performance during the period, instead of after the period ends. This will allow the Agency to adjust performance to better meet goals where needed.

Most of the data related to the current performance measures is now in our Data Warehouse. DOR has procured a business intelligence tool, Business Objects, to use in the timely delivery of these measures to all users.

In addition, the Federation of Tax Administrators continues to be the host for collecting and maintaining various elements of performance data from the participating states. This project was initiated to facilitate the use of comparisons of participating states to determine “best practices.”

During the past year, the project has focused on setting uniform collection measurements. DOR will include any new measures to our system so that we can better benchmark performance with other state revenue agencies.

Upgrade Our Technology Infrastructure:

Upgrading our technology infrastructure is another of the multi-year projects. In regard to creation of the new infrastructure for SCITS production environment, this was completed in June 2008. This included an upgrade in servers, SQL database management software, an operational load-balancing appliance, and supporting software tools. Work will continue in this area to update the DOR website to provide enhanced capabilities and usability. Security policy documentation is also an important work in progress.

Improve Processing Operations Performance:

Improving processing operational performance is a major ongoing project. More than 100 process improvements were made in Revenue Operations again this year. The Processing area has participated in the writing, review and testing of various General System Design documents related to the processing functions being developed for SCITS.

To improve paper processing, Revenue Operations updated the new batch cover sheet and will be fine tuning the document to reduce the amount of paper from 22 batch cover sheets to one. This is a significant time and resource savings. DOR significantly reduced deposit opportunity cost from \$134,255 to \$114,000 when compared to FY07. The opportunity cost decrease represents a 70 percent decrease over the past two years.

Individual income tax returns were processed on average within 17 days of receipt. Note that the 17 days includes seven days for the Treasurer's office to print the check. We processed 8.6 million transactions this year.

Significant enhancements were implemented from the Mail Center to Deposit and in the Record Center this year. These enhancements reduced rework and helped eliminate or reduce various errors from section to section. Returns for sales, withholding, corporate and income taxes were modified for 2008 to allow the scanning and imaging processes to increase read rates and reduce the need for verification and keying. The Scanner Section set a new daily deposit high of \$31.5 million on January 2, and a new monthly high in January of \$160 million. In comparing FY08 to last fiscal year, the Scanner Section scanned 78,319 more checks and deposited \$205 million more this year.

The Records section installed two new scan stations, enabling employees to have access to the images at their desktop via FileNet instead of requiring microfilming. This created major time efficiencies for both Records staff and their customers. The Records team also moved the Rosewood warehouse to the Market Pointe office. This greatly reduced the turnaround time of requested returns for internal and external customers. With the additional space, this also allowed them to maintain two years of returns on the shelves for individual income tax, corporate, partnership and fiduciary returns. Lastly, with the elimination of having four employees travel to and from the Rosewood warehouse twice a day, the area gained the equivalent of a .75 FTE at Market Pointe.

Develop Procedures for County Reimbursement Under New Property Tax Legislation (H4449):

This legislation required DOR to develop a program and plan of implementation to accurately and efficiently reimburse local taxing entities for the property tax exemption. DOR's new Local Government Services system is now being used to collect and analyze data and issue reimbursements to counties, municipalities and school districts under all local government programs. This includes programs previously administered using the Office of the Comptroller General's system, as well as new programs mandated under this legislation. Reimbursements totaling \$989,059,639 were issued timely by DOR for FY08. Development is in progress to enhance this system to collect county reporting data via the internet. Counties provide this data to the state annually, beginning in September.

Improve the Forms Development Process:

An agency-wide task force was chartered to recommend changes within the forms development, printing, distribution and approval processes. A second phase of the project included a review of communication processes with taxpayers, forms vendors, tax preparers, and other stakeholders. This effort produced substantial improvements. Examples include implementation of a list serve that facilitates communication with software developers. Vendor mailing of over one million IIT postcards to taxpayers that filed electronic tax returns was eliminated for a savings of over \$289,126. IIT postcards were replaced by marketing and education provided to taxpayers via various media. The paper Package XSC was discontinued, but CD's are available to the public. A formalized process was implemented to receive and track vendor forms submissions. Improvement of the forms development process will be a continued area of importance for process improvements.

Guide Agency Workforce Planning Initiatives:

DOR has a significant percentage of the workforce who either is or will be eligible to retire in the next five years. The objective of this multi-year project is to continue planning for the loss of expertise, to develop new leaders, and to recruit, train and retain a high quality workforce. Planning for and minimizing the impact of these exits was, and continues to be, a priority.

Agency staff has addressed this objective in a number of ways, including identifying critical business needs, legislative mandates, and the associated resource needs. In several cases, DOR has hired ahead to ensure adequate transition time to train a successor in very complex areas. The Agency has used job analysis extensively to document specific jobs and actively used this tool for revision of existing career paths and development of several new ones this year.

Approximately 52 percent of DOR's workforce has a career path that promotes and rewards the development of increasingly complex job competencies. The state Office of Human Resources correlates our lower turnover rate to several things, including the prevalence of these structured development plans. DOR's turnover rate this year was 9.9 percent, compared to the state's turnover average of 14.06 percent.

We employed varied strategies to make DOR an employer of choice. This year we expanded recruiting, enhanced new employee orientation processes, focused on training, increased

recognition and wellness initiatives, and allowed the option of flexible work benefits such as flex time, flex work week, and telecommuting in selected job areas.

Leadership development is also extremely important. Participation in the Associate Public Manager Program is required for all new supervisors. In addition, we fill all allotted seats each year in the Certified Public Manager Program. Executive Institute participation has also been a priority. Internal leadership development workshops are also available through the year.

In addition, our senior leadership team this year went through a training process on leadership competencies. In turn, the remainder of the Department's leadership team also attended this same workshop in order to sustain the learning and emphasize the importance of good leadership. We are applying those tools to many of the projects that are ongoing in the Agency.

Implement the Statewide E-Recruitment Initiative:

The marketplace of recruitment has become more competitive and, therefore, is more critical for us to address wisely. To better position state government to attract talented employees, the state purchased a new e-recruitment system that is in use throughout state government. It was implemented this year within DOR. This online system has immensely increased the number of applicants for most positions. In FY07, the total number of applicants for our open positions was 4,157. This year, we had 10,715 applicants, an increase of 157%, despite the fact we had 30 percent fewer job postings. The number of qualified applicants in the new system increased by 11 percent and 99.57 percent of applications were made online. The Agency had an 87.6 percent acceptance rate of job offers.

Ensuring a diverse workforce is another factor of significance to the Department. As of September, 2007, the Department was ranked fourth among agencies of 501-1000 employees and ranked 12th among all state agencies in the State Human Affairs Commission Report to the Legislature. DOR had 95.4 percent EEO goal attainment.

Enhance Tax Law and Systems Training:

It is important that our tax professionals are highly knowledgeable of both the tax laws and their duties in administering them. We use both structured training and on-the-job training to support this goal. This training includes technical tax law topics, disclosure training for all DOR employees, State Legislative Updates, and systems training. This year a minimum of 9,313 hours were dedicated to formal classroom training of employees. This averages 13.4 hours per authorized FTE position.

With the advent of the new SCITS system in FY09, the training team has designed and is implementing a massive and aggressive training plan to ensure that all DOR employees have the appropriate systems skills when the new system replaces the existing South Carolina Automated Tax System (SCATS).

Taxes Administered by DOR

The following information includes excerpts from the Department of Revenue's Business Tax Guide. A copy of the complete publication can be found at www.sctax.org.

In South Carolina, most taxes are administered, collected and distributed through DOR. For other taxes, such as local property taxes, DOR is involved administratively in valuation and administration, but the taxes are assessed and collected at the local level.

Below, you'll find that the descriptions are organized by the major state taxes and then followed alphabetically by the other state level taxes administered by DOR. At the end is a discussion of the property tax assistance DOR provides to local governments.

Sales and Use Taxes

SALES AND USE TAX

Enacted:	1951
Statute:	Title 12, Chapter 36
Rate:	6% plus local taxes
Distribution of Statewide 6% Tax:	80% Education Finance Act; 20% Education Improvement Act
FY 07-08 Collections:	\$2,469,165,167

Sales tax is imposed on the sale of goods and certain services in South Carolina. Use tax is imposed on goods and certain services purchased out of state and brought into South Carolina or on which no sales tax has been paid.

The statewide sales and use tax rate is six percent. Counties may impose an additional one percent local option sales and use tax and one percent special local taxes if voters

in that county approve the tax.

Generally, all retail sales of tangible personal property are subject to the state's sales or use tax.

The sales tax also applies to the fair market value of tangible personal property previously purchased by the retailer at wholesale (for resale), but used by the retailer or any other person withdrawing tangible personal property to be used and consumed by them. In addition to applying to items one normally thinks of as tangible personal property - furniture, appliances, and clothing for their own use, the sales and use tax also applies to communications like local telephone services, cable television services, satellite programming services, faxing services and paging services, as well as laundry and dry-cleaning services, accommodations, and electricity.

A maximum sales tax of \$300 is imposed on the sale or lease of motor vehicles, boats, aircraft, motorcycles, trailers or semi-trailers pulled by a truck tractor, horse trailers, recreational vehicles and certain self-

propelled light construction equipment.

The \$300 maximum tax also applies to the sale of musical instruments and office equipment sold to religious organizations.

USE TAX

Anyone who buys tangible personal property from out-of-state and brings it into South Carolina is responsible for paying a use tax at the rate of six percent plus any applicable local taxes on the sales price. Businesses that make non-taxed purchases out of state, report and pay the use tax on their monthly sales and use tax return, State Sales and Use Tax Return, form ST-3. Individuals that make non-taxed purchases out of state should report and pay the use tax on their Individual Income Tax Return (SC 1040) or the UT-3 form (Use Tax).

If the amount of the sales or use tax paid in the other state is less than the amount of use tax imposed, the purchaser will pay the difference. The same rules for sales tax also apply to use tax.

South Carolina's income tax follows the federal income tax laws. South Carolina generally accepts the adjustments, exemptions and most deductions allowed on your federal return.

Your federal taxable income is the starting point in determining your state income tax liability.

You may be required to file a South Carolina income tax return if you earn income in South Carolina and are required to file a federal return. Even if you are not required to file a federal return and you have taxes withheld from your wages, you should file a state income tax return in order to

obtain a refund. For calendar year taxpayers, individual income tax returns are due on April 15 of each year. Taxpayers who file electronically may file and pay income taxes by May 1.

Estimated Individual Income Tax Payments

Declaration of estimated tax is the method you use to pay tax on income that is not subject to withholding. It would include income from self-employment, interest, dividends, alimony, rent, capital gains and prizes. You may also have to pay estimated tax if enough tax is not being withheld from your salary, pension or other income. Generally you should make estimated tax payments if your estimated tax liability will be \$100 or more. If your estimated tax liability will exceed \$100, you must pay in at least 90% of the tax to be shown on your current income tax return or 100% of the tax shown on your last year's income tax return, whichever is less.

The 100 percent rule is modified to be 110 percent of last year's tax liability for an individual with an adjusted gross income of more than \$150,000 as shown on the return for the preceding tax year. Estimated tax payments are due April 15, June 15, September 15 and January 15 for calendar year taxpayers.

Local Government Property Tax Assistance

Property taxes are generally assessed and collected by local governments, but the Department of Revenue assesses and collects some property taxes and oversees all property tax assessments to ensure equitable and uniform assessment throughout the state. Real property is subject to property taxes. Personal property used in business and certain personal property used for personal purposes such as motor vehicles, boats and airplanes are subject to property taxes. Businesses must report business personal property to the Department of Revenue. There is no state or local tax on intangible personal property or inventories.

Each class of property is assessed at a ratio unique to that type of property. The assessment ratio is applied to the market value of the property to determine the assessed value of the property. Each county, municipality or other taxing entity then applies its millage rate to the assessed value to determine the tax due. A mill is a unit of monetary value, equal to one-tenth of a cent, or one-thousandth of a dollar (.001).

For example, if the millage rate is 200 mills and the assessed value of the property is \$1,000, the tax on that property is \$200.

Real and personal property of manufacturers, utilities, railroads, carlines and airlines and business personal property of merchants is assessed by the Department of Revenue. The county assessor assesses all other real property. The county auditor assesses all other personal property.

The following assessment ratios are applied to the value of the property to determine the assessed value for purposes of taxation:

Manufacturing Property
10.5% of FMV

Utility Property
10.5% of FMV

Railroads, Private Carlines, Airlines & Pipelines
9.5% of FMV

Primary Residences
4.0% of FMV

Agricultural Property (privately owned)
4.0% of use value

Agricultural Property (corporate owned)
6.0% of use value

Other real estate
6.0% of FMV

Personal property
10.5% of income tax depreciated
value. (Scheduled to be reduced by
0.75% per year starting in 2002, to a
level of 6% by 2007.)
